ADIL AHAMED

Aspiring L1 Cloud Support Engineer | AWS & Azure Fundamentals | Linux | Networking | Troubleshooting

Chennai, India | +91 6374336616 | adil.ahamedwork@gmail.com | linkedin.com/in/adil-ahamed-13b935279

PROFESSIONAL SUMMARY

B.Sc. Computer Science graduate (2025) with hands-on fundamentals in AWS (EC2, S3, IAM, RDS) and Microsoft Azure core services, built through self-directed, project-based learning. Comfortable working in Linux (Ubuntu, Kali) and Windows environments, with a solid grounding in networking, system security, and monitoring concepts from coursework and cybersecurity lab practice. Brings a methodical, logs-first troubleshooting mindset, clear communication skills, and genuine enthusiasm for cloud infrastructure. Available to work from the Teynampet office on rotational shifts and week-offs.

TECHNICAL SKILLS

Cloud: AWS Fundamentals (EC2, S3, IAM, RDS), Cloud Computing Concepts, Microsoft Azure Fundamentals

Infrastructure & Networking: Virtual Machines, Storage Concepts, TCP/IP, Networking Fundamentals, Security Fundamentals, Monitoring Concepts

Operating Systems: Linux (Ubuntu, Kali Linux), Windows

Troubleshooting: Basic System Troubleshooting, Cloud Troubleshooting Fundamentals, Incident & Alert Analysis

Programming & Database: Python, SQL

Security Tools: Nmap, Wireshark, Burp Suite (CEH training)

RELEVANT HANDS-ON LEARNING

- CEH Practical Training (Ethical Hacking & Security Labs): performed systematic network enumeration and traffic analysis with Nmap and Wireshark on Linux, applying a structured, step-by-step approach to identifying and isolating issues — a troubleshooting method directly transferable to cloud incident response.
- LetsDefend SOC Monitoring Exercises: reviewed simulated security alert logs to spot patterns and trace root causes, practicing the same log-analysis and monitoring discipline used to triage cloud alerts.
- TryHackMe Security Challenges: completed 20+ practical exercises requiring systematic diagnosis under time pressure, reinforcing methodical problem-solving and attention to detail.
- PortSwigger Web Security Academy (SQL Injection Labs): used Burp Suite to study how web applications process requests, building a working understanding of client-server interaction and data flow relevant to monitoring web-facing services.

CERTIFICATIONS

- EC-Council Certified Ethical Hacker (CEH) — Cert. No. ECC0837164295
- LetsDefend — SOC Fundamentals
- TryHackMe — Cybersecurity Labs
- PortSwigger Web Security Academy — SQL Injection & Web Security Labs

EDUCATION

Bachelor of Science (B.Sc.) — Computer Science 2022 – 2025

The New College, Chennai

RELEVANT COURSEWORK

Computer Networks • Operating Systems • Database Management Systems • Software Engineering • Data Structures & OOP

AVAILABILITY & LANGUAGES

Available: Immediately | Willing to work rotational shifts & rotational week-offs, Work From Office — Chennai

Languages: English, Tamil, Hindi (Fluent)
